

How to calculate khums of salaried married couple

4 /Dec/ 2016

Q: Is it possible for a husband and wife to specify a single common date for khums, when they both use their incomes together for their costs?

A: Each one must have a separate and independently specified date for the khums year in terms of his/her income. It is obligatory for each of them to calculate the khums of the remaining portion of his/her own incomes at the end of the year.
